

ERRATUM TO “POSSIBLE CONNECTIONS BETWEEN
WHISKERED CATEGORIES AND GROUPOIDS, LEIBNIZ
ALGEBRAS, AUTOMORPHISM STRUCTURES AND
LOCAL-TO-GLOBAL QUESTIONS ”, VOL.5 (1) 2010, PP.305-318.

RONALD BROWN

(communicated by Hvedri Inassaridze)

This Note is intended to correct a lack of attribution in the paper [Bro10]. That paper cited the paper [Gil98], but without the paper in hand, I failed to state that the definition of whiskered category is the same as the definition of semi-regular category in [Gil98]. Further, Proposition 5 of [Bro10] is the same as Proposition 1.2 of [Gil98].

‘Resolutions of monoids’ which is [Bro10, Section 6] is surely related to [Gil98, Section 3] on ‘Monoid presentations of groups’, but the precise relationship needs further work. Clearly we both started from ideas in the joint paper [BG89a].
